RE: A Unique Way to Help Kleos Kids, **UPGRADE YOUR CELL PHONE!**

Dear Kleos Supporters,

Most of you know me through the cellular business, as I have been upgrading your phones in the area for about 10 years now. I want to tell you about a company that has great cellular service, and can help out your favorite charity at the same time.

Can you believe it has been over 20 years since God placed it on the hearts of Gordon and Vicki Hankins to provide a place of loving care and sanctuary for children needing long term residential care? We have all heard and seen the wonderful miracles and good works that God has done and continues to do through the ministry at Kleos Children's Community. Children who slip through the cracks in society come to Kleos with low self esteem, but soon discover through love, support and affection that they are an individual miracle of a God who created them, loves them, and has a plan for their life! What greater gift could you give a child? **"I have no greater joy, than to know that my children walk in the ways of the Lord."** **3John 1:4.** It all began with your prayers and the faith that Gordon and his family has had, trusting God to provide in ways unimaginable to accomplish His purposes!

There is a cell phone company called **Lightyear** that has partnered with the Verizon Network to provide cellular service and pays back up to 10% of a customer's bill to the individual or company that refers customers to their services. By upgrading your cellular service to **Lightyear**, through a Kleos referral, you can help Kleos Children's Community obtain additional funding for their program. **Lightyear** is not the Verizon company, but has partnered with the Verizon Network and offers plans that are competitive and free mobile-to-mobile calling to the millions of Verizon customers. You can port your existing numbers and get free phones, free activation and no credit deposit is required with **Lightyear**. You get to use your new cell phone on the **Nations Best and Most Reliable 3G Network** while **helping a child** at the same time!

You can activate your new phone online at www.helpachild.mywirelessrep.com . On this website you can see the phones, review the rate plans and even watch 2 short videos about the company and compensation opportunities. If you need help activating your new phone, you can Gordon or I and we will help you or answer any of your questions.

Thank-you for giving to Kleos! Please don't replace your giving with this offer, but consider how using this service would provide additional needed support for Kleos.

Hal
